amplivoxBEEP

ALL-IN-ONE SOLUTION

Amplivox BEEP is an intuitive hearing test and send solution consisting of our state-of-the art modelONE air conduction screening audiometer, integrated within noise reducing headphones.

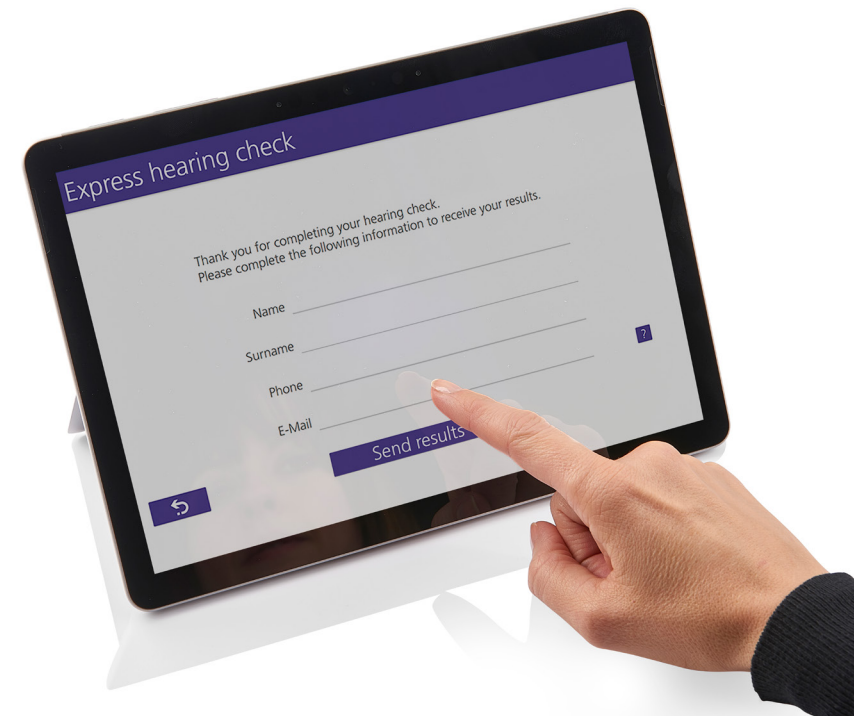

With the addition of a built-in microphone within the headset, ambient noise levels are monitored to ensure accurate testing and will automatically pause the test when required.

All test settings can be fully customised. These include: tested ear, used frequencies, starting level, level step, acceptable noise level and pass/ refer criteria.

Designed to be used both in an unattended or guided setting, patients are presented with an automated test routine through pre-defined test and frequency specific levels via user-friendly on-screen instructions. The entire process takes under three minutes and provides immediate customer hearing result feedback.

KEY FEATURES

- All-in-one audiometer, microphone and headphone
- Easy to set-up and patient-friendly
- Full design and function customisation anytime
- Definable pass/refer levels
- One-off cost. No expensive database or subscription fees
- No database or cloud. Results to your inbox for immediate follow up
- Fully secure with patient results sent via e-mail with password protection
- Ambient noise monitoring to ensure accurate testing.

TEST AND SEND

Amplivox Beep allows for accurate screening with fast results management focused, such as integration with medical records.

Amplivox Beep is a simple solution that can be added to family practice, a school or a primary care setting. Either through a self service or in a guided setting through a professional, the test subject can follow the easy to understand on screen instructions to complete their hearing test with results being sent on for follow up immediately through secure email. Where required, the test subject will also receive the required hearing care information depending on their test results. This communication can be easily tailored to the target patient group.

COMMUNITY CARE PROVIDERS AND PRIMARY CARE

Healthcare professionals provide many different services and levels of expertise and have to learn how to operate many systems and pieces of equipment. This audiometry solution has been designed to

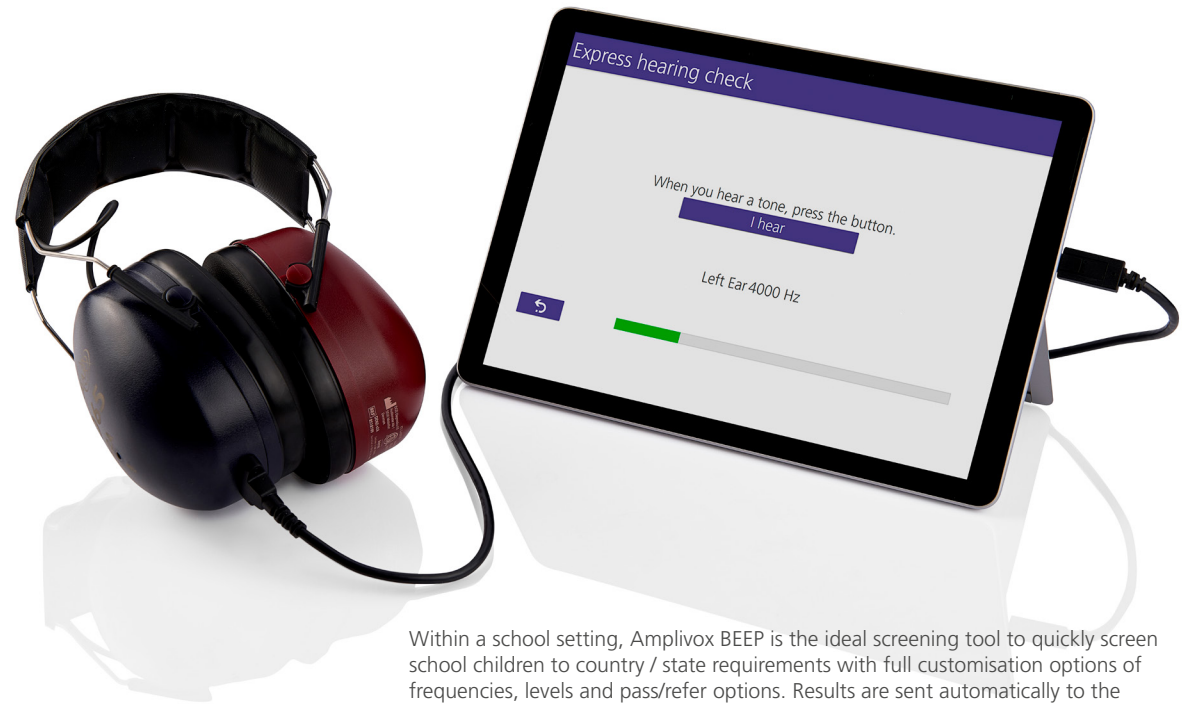

offer a guidance-free self-service hearing care assessment with automatic direction of results according to your requirements.

SCHOOL SCREENING

Take your school screening programme to the next level where children can be screened quickly according to national or local standards with fast results processing. Audiometric threshold results are automatically and securely emailed to the school for results processing and parents / carers can receive further information and guidance on results as well as how to protect their hearing, reducing the administration time of school nurses and other professionals.

COMFORTABLE COMMUNAL SPACE TESTING

Many find assessing their hearing when they have an inkling of a hearing loss as uncomfortable. This simple solution allows for self-guided testing without the use of hearing care provider which allows subjects to complete a test in their own time and in the privacy of being in a comfortable space.

Within a school setting, Amplivox BEEP is the ideal screening tool to quickly screen school children to country / state requirements with full customisation options of frequencies, levels and pass/refer options. Results are sent automatically to the school nurse or designated recipient for easy processing or attachment within an electronic medical record (EMR) file.

LEAD GENERATION

Healthcare and audiology professionals are increasingly seeing the importance and opportunity to reach and build relationships with patients suffering from hearing loss within their area, as part of an early intervention program.

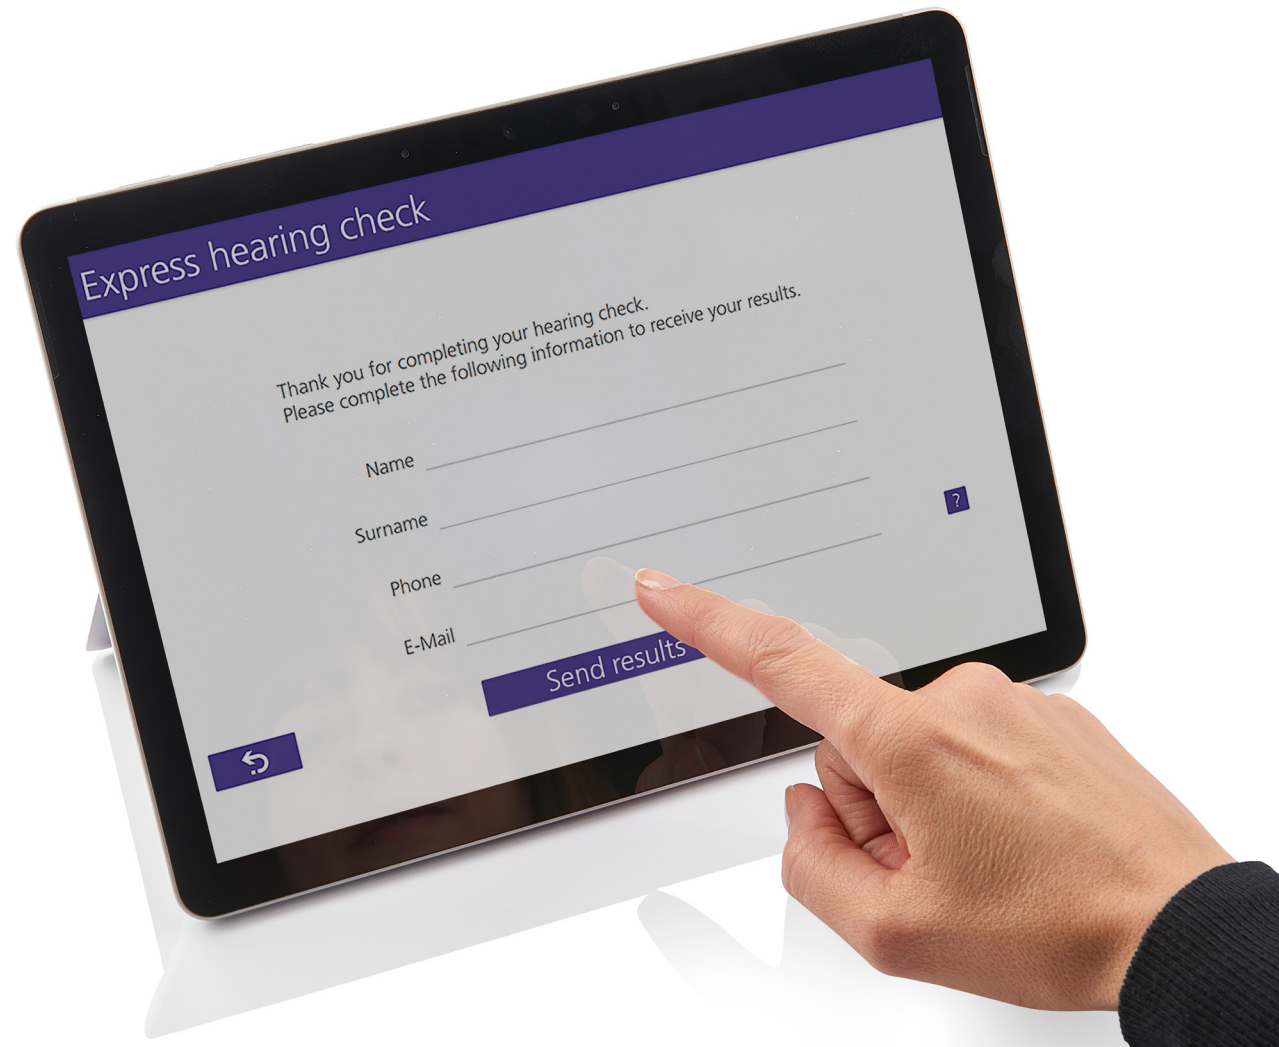

Lead generation is the first step in building relationships with customers. Amplivox BEEP facilitates the first step with a solution which is ideally suited to being used in a standalone setting or assisted with by a promoter.

Due to the systems complete configuration ability, all settings and qualification criteria can be adjusted to your target market requirements.

Results are handled the way you would like. Decide between sending information relevant to patient hearing levels or full audiometry test results before building long lasting hearing care relationships.

Thanks to its small footprint as either a stand-alone solution or kiosk, this portable audiometer can be located within local pharmacies, physician offices, dispenser stores, care homes, assisted living facilities, schools and other community venues for complete convenience and flexibility.

Opticians are using BEEP as part of their pre-appointment health checks to help provide a better and additional level of patient care.

IMPROVED WORKFLOW

Amplivox BEEP is designed to improve the daily workflow of audiologists and hearing professionals working in a healthcare setting through fast testing and efficient results management. When a patient has completed their hearing assessment, their hearing evaluation information is sent directly to their email inbox. The provider receives full test and background test information, allowing for an immediate focus on building a doctor/patient relationship (DPR).

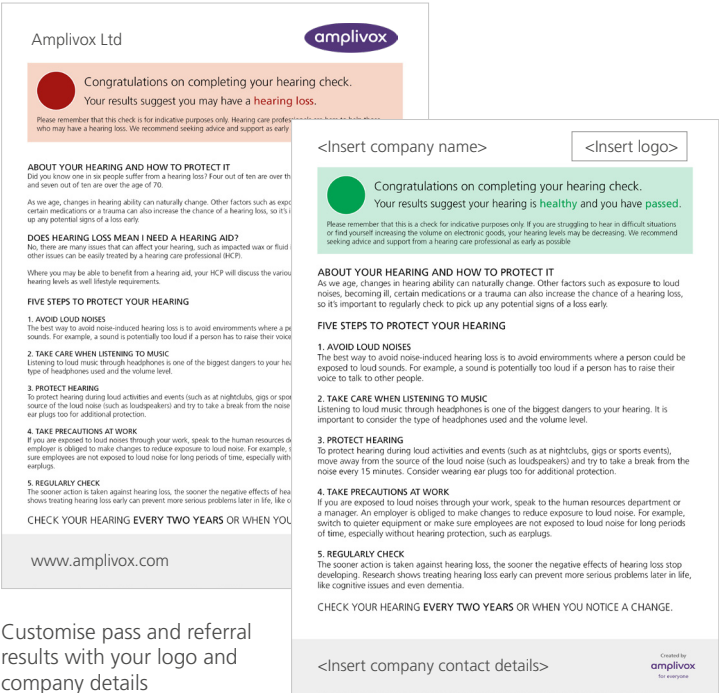

With the use of secure email as a communication platform, no additional database systems need to be integrated or maintained.

Users of the system such as hearing aid dispensers, healthcare retailers and healthcare professionals can also schedule additional tests and gather information about potential hearing aid recommendations, making this the perfect lead generation tool.

FULL CUSTOMISATION

With the added benefit of a design feature editor, the patient interface can be fully customised to align with your brand including on-screen languages, auto-test workflows, company logo, colour scheme and patient messaging.

The design and test features can be amended at any time, with the ability to customise the screening workflow in almost every degree, making the amplivoxBEEP the perfect mobile hearing screening facility

Customise pass and referral results with your logo and company details
